DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: (1) a wound dressing with at least one compliant element corresponding to an intermediate portion of the absorbent core, (2) a wound dressing with an absorbent core containing a plurality of discrete portions of at least one absorbent material, (3) a wound dressing with an absorbent core that includes a plurality of receptacles each containing a discrete portion of at least one absorbent material, (4) a wound dressing with an absorbent core comprised of hydrophilic foam, (5) a wound dressing with an absorbent core comprised of non-woven material, (6) a wound dressing with at least one compliant element disposed along a border portion of the absorbent core, (7) a wound dressing with at least one compliant element disposed along a central portion of the absorbent core. The species are independent or distinct because they are not useable together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 3761

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
